

Samsung GALAXY Tab Active

BUILT FOR BUSINESS

Thrive in any business environment
with a field-proven, work-ready tablet.

Stylishly Rugged

A portable tablet built for the enterprise world

Meet the GALAXY Tab Active, Samsung's first tablet built to the highly demanding standards of professional enterprise users. Designed to deliver powerfully versatile performance and secure operations, the GALAXY Tab Active is a stylish, portable tablet device that is ready to go anywhere to get the job done.

• Stay protected in any environment

- Protected against accidental drops up to 1.2 meters (with protective cover)
- Dust and water resistance (IP67 certified)

• Stylishly portable and superbly connected

- Slim and light with premium and dynamic design language
- Replaceable battery for longer hours of use (Additional battery sold separately)
- A truly wide range of connectivity options

• Enterprise ready right now

- A wide range of essential enterprise tools
- Enterprise grade mobile security with Samsung Knox 2.0

Stay Protected in Any Environment

However challenging the surroundings may be, the GALAXY Tab Active can always be counted on for professional, on-demand performance, featuring top-tier data security and seamless operations.

• Military grade protection

The GALAXY Tab Active comes with a specialized cover that protects the device from extremes and is in full compliance with U.S. military anti-shock standards (MIL-STD 810G). That means the GALAXY Tab Active is capable of withstanding the toughest of shocks, enduring everything from the continuous minor bumps and bruises of everyday usage to more severe drops of up to 1.2 meters, even on solid concrete.

• Keeping water and dust out

The GALAXY Tab Active has a water and dust resistance rating of IP67. That certification means that even if the GALAXY Tab Active falls into water 1 meter deep, device integrity will not be breached for at least 30 minutes. It even has a special coverless micro-USB port which maintains easy connectivity while keeping dust and debris out. In other words, it is ready to work no matter which environment it gets thrown into.

Stylish, Portable and Flexible

The GALAXY Tab Active is stylish by any standard. A truly portable and versatile tablet finely crafted for business professionals.

• Slim and stylish. Light and portable.

With or without its protective cover, the Tab Active boasts a stylish design that sets new standards for what a solidly built device should look like. When the protective cover is removed, it cuts a truly impressive line, with a slim profile measuring just 9.75mm. And, naturally, it is light enough to give professionals the easy portability they demand when they transition from the office to the field.

• Flexibility and productivity on the go

The GALAXY Tab Active is a true mobile device built for performance and productivity on the go. It comes packed with a large capacity 4,450mAh battery that has plenty of power for a full day of use (11 hours) that can easily be replaced with a spare. The Tab Active also features Samsung's exclusive Ultra Power Saving Mode, allowing it to run for days without shutting down.

And with a wide range of connectivity options, business professionals working outside the office can stay connected with their clients and colleagues at all times. From HEXA-Band LTE support for global travelers, to Wi-Fi and Bluetooth, it provides seamless connectivity.

SAMSUNG

The Perfect Enterprise Companion

The GALAXY Tab Active features rich functionality that caters to the most demanding enterprise environment. At the office, in a meeting, or on the road, the GALAXY Tab Active is the perfect enterprise companion.

• 3.1 MP rear facing camera with auto focus and flash

The fast and accurate 3.1 megapixel rear-facing auto focus camera lets enterprise users capture high quality images for situational reports about what is happening on the job site. Tab Active also comes with an exclusive barcode solution developed together with Honeywell for easy barcode scanning, which is perfect for retail and logistics verticals.

• POGO pin charging

Being able to charge multiple devices quickly is essential at many businesses. The GALAXY Tab Active has a 3-PIN POGO connection, making it simple and convenient to plug in more than one device using a Gang charger. The POGO pin also prevents potential damage that can be caused by loose micro-USB connectors. (*Gang Charger sold separately)

• Near Field Communications

The GALAXY Tab Active supports NFC connectivity for reading and writing. NFC tagging makes it easy to check personnel attendance, and can be used in multiple logistics scenarios as well.

• A pen for easier input

Professionals that wear gloves in the field will appreciate the built-in C Pen that's slotted thoughtfully at the top of the protective cover. It's easy to access and use, and makes data input even easier.

Samsung Mobile Care: Extended Care and Service

From an Extended Warranty to Accidental Damage from Handling, GALAXY Tab Active comes with a full range of standard and additional services for enterprise customers all over the world.

• Samsung Mobile Care for GALAXY Tab Active

If you purchase Samsung Mobile Care for GALAXY Tab Active, basic warranty coverage period of GALAXY Tab Active will be extended up to 3-year. This covers not only device but also battery. Battery replacement service is provided for battery depletion. (This service does not cover unexpected damage caused by customers.)

• Accidental Damage from Handling

The Accidental Damage from Handling (ADH) service is provided as an option for any unfortunate damages that may occur during the whole warranty period. ADH especially for GALAXY Tab Active provides 1 time LCD crack repair service during 3-year.
